

**SPECIFICATION AMENDMENTS**

**Please amend page 16, paragraph 4 as follows**

---

5           At step ~~308~~ 309, the system loads an instance of the web service driver, and initializes it.

*CJ*       The system passes the handle to the session, as well as the service parameters defined in the web service metadata. The service parameters are used by the driver for configuration purposes.
